EXAMINER'S AMENDMENT/REASONS FOR ALLOWANCE

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Peter Olexy (Reg # 24513) on 07/21/04.

The application has been amended as follows:

In claim 28, line 2, the word "in" has been inserted between the words "subject" and "need".

In claim 29, line 2, the word "in" has been inserted between the words "subject" and "need".

In claim 30, line 2, the word "in" has been inserted between the words "subject" and "need".

The following is an examiner's statement of reasons for allowance: The examiner has found claims 10-30 to be unobvious over the prior art of record and therefore to be allowable over the prior art of record. The present invention relates to glucopyranosyloxypyrazole derivatives or pharmaceutically acceptable salts thereof and benzylpyrazole derivatives. The most relevant prior art documents (Journal of Medicinal Chemistry (1996), 39 (20), 3920-3928; US 5,264,451; US 5,274,111) to this invention disclose generally, benzylpyrazole derivatives that are generally similar to those of the prior art.

However, though the benzylpyrazole derivatives of the present invention are generally similar to those claimed in the prior art documents, they possess differences that are not suggested and are unobvious to those of the prior art. For example, the compounds of the prior art documents do not contain lower alkyl groups in the position represented as R3' on the pyrazol-3-one ring of the claimed benzylpyrazole derivative nor the glucopyranosyl substituent or residue that is attached to the pyrazole ring of the benzylpyrazole structural moiety.
